

## Aqua U V Light Selection Information

**UV lights are effective for green water algae. They are not effective for string algae.**

Aqua Frog & Aqua Fish spit out into the water

Advantage 2000 is a low priced unit with barbed connections

8 Watt & 15 Watt units have 3/4" FIPT Connections

25 Watt and above have 2" slip connections

Aqua UV makes their own lamps and guarantees UV output for 14 mos.

After 14 months, the effectiveness will diminish and lamp should be replaced.

UV lights are most effective when they are pulling water from the bottom of the pond and away from the pond inlet.

**Recommended Pond Size & Flow Rates**

Description		# Lamps	Sterilizer	Flow Rate (gph)	Clarifier	Max Flow (gph)	Salt Water
